April 22, 2024

New York State Department
of Environmental Conservation
Division of Materials Management
Pesticide Product Registration

Classified for
“RESTRICTED USE”
in New York State
under 6NYCRR Part 326

Doc id: 593243

Directions for Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, and precautions on the product label.
- For best results, applications should be made during periods of active growth.
- Follow all applicable maximum seasonal and per application use rate limits for each use site listed on the product label.

The following species are Tiered by the Lower Hudson Partnership for Regional Invasive Species Management but are not labeled for control by the herbicide Vastlan. While some of these species can be managed manually, it is important for land managers to be able to utilize herbicides for vegetation control when necessary. The below recommended rates in accordance with rates listed on the Vastlan label for similar species and application methods.

Common name	Scientific name	Cut stump recommended rate	Hack and squirt recommended rate	Foliar spray recommended rate
Golden rain tree	<i>Koeleruteria paniculata</i>	50-100% Vastlan	50-100% Vastlan	1-10% Vastlan
Japanese pagoda tree	<i>Styphnolobium japonicum</i>	50-100% Vastlan	50-100% Vastlan	1-10% Vastlan
Silver vine	<i>Actinidia polygama</i>	50-100% Vastlan	50-100% Vastlan	1-10% Vastlan
