GENERAL INFORMATION
IMPEL™ is a low viscosity, non-aromatic diluent with non-ionic surfactants and selected emulsifiers. IMPEL™ is designed for basal-bark and cut-surface brush control applications with "GARLON 4®", "ACCESS®" or other oil-soluble herbicides which are registered for woody plant vegetation control. IMPEL™ is approved for use in Forestry, Industrial, Rights-Of-Way, Ditch Bank and other non-cropland applications that require an oil diluent such as previously used Diesel Fuel or Kerosene as a penetrant.

DIRECTIONS FOR USE
IMPEL™ can be used at dilution ratios of 1:4 (20%) or 1:3 (25%) when following the herbicide manufacturer's label recommendations.

NOTE: Use rates may vary dependent on environmental conditions and applications. Increase rates as necessary for additional wetting and penetration. Follow recommendations and label rates of herbicide manufacturers.
